Prison time & no more license to practice law for US Justice attorneys Friedrich, Glavin, Morris et al who withheld and manipulated evidence that lead to a guilty verdict for Alaska Senator Stevens?

Read the reports and you decide. (WSJ, 3-17-2012)

That's what citizens can & probably should request happen to all the US Attorneys responsible for this failure of justice which changed the balance of power in the U.S. government. Those attorneys got their licence probably from the District of Columbia. The State can jerk their license. A judge could require an independent investigation. Obama could order his Attorney General to act

But don't hold your breath [as you will turn blue in the face waiting] for U.S. Attorney Eric Holder or President Obama to act. Three years have passed and Holder has not disciplined any of the men or woman involved.

ObamaCare got vote #60 from Alaska Democrat Senator Mark Begich when Senator Stevens lost the election in 2008 shortly after U.S. Justice department obtained a guilty verdict based on systematic concealment of significant exculpatory evidence.
